

POLISH PREP

DUNLOP POLISH PREP is a deep cleaning solution which will remove dirt, marks, existing sealers and coatings from timber, vinyl or laminate floor to be polished. DUNLOP POLISH PREP will not damage or affect the flooring*.

DIRECTIONS

DO NOT MIX WITH HOT WATER.

Dilute at 200mL/L of water. For stubborn or heavy build up dilute 400mL/L of water.

1. Apply diluted DUNLOP POLISH PREP liberally to the floor and allow to work for 3 to 5 minutes, ensuring to keep the floor wet.
2. Scrub the floor using a stiff broom or swivel head scourer attached to a mop handle.
3. Pick up the dissolved sealer using a mop and bucket. Rinse the floor with a fresh mop and clean water. Allow the floor to dry.
4. If any old sealer remains repeat these directions on affected area.
5. When dry, seal the floor with 2-3 coats of DUNLOP PERFECT POLISH as per label directions.

*NOTE

DUNLOP POLISH PREP may temporarily interfere with the adhesion of self-adhesive vinyl and laminate flooring if used incorrectly. When DUNLOP POLISH PREP is used to prepare self-adhesive vinyl and laminate flooring, do not allow product to pool on the surface and do not allow to contact for longer than 5 minutes. If any adhesion issues occur allow the floor to dry completely and follow flooring manufacturer's instructions to re-adhere the offending sections.

COVERAGE

1 litre of DUNLOP POLISH PREP will prepare 75m² at 200mL/L and 37.5m² at 400mL/L.

Call DUNLOP TOLL FREE HOTLINE prior to the use of DUNLOP POLISH PREP on unsealed natural stone. If in doubt, always test the product in an inconspicuous area prior to first use.

SPILLS

Contain spills with sand or earth. Dispose of leaked content in appropriate container. Wash down area with large amounts of water.

FIRST AID

For advice, contact a Poisons Information Centre (Phone Australia 131 126; New Zealand 0800 746 766) or a doctor. If swallowed do NOT induce vomiting. If in eyes, hold eyelids apart and flush the eye continuously with running water. Continue flushing until advised to stop by the Poisons Information Centre or a doctor, or for at least 15 minutes. If skin contact occurs, remove contaminated clothing and flush skin and hair with running water. MSDS available at www.dunlopdij.com
